Objective

Aspiring software developer with a strong foundation in Java, Python, and full-stack development. Passionate about building scalable applications and solving real-world problems through technology. Seeking opportunities to contribute, learn, and grow in a dynamic tech environment.

Education

Dr. B.C. Roy Engineering College, Durgapur

2021 – Present

Bachelor of Technology in Information Technology

Current CGPA: 6.91

Naisarai High School

2021

Higher Secondary Education (PCM)

Percentage: 72.8%

Technical Skills

- **Languages:** Java, Python, JavaScript, HTML, CSS, MySQL
- **Tools:** Git, GitHub, IntelliJ IDEA, VS Code, Docker
- **Frameworks:** React.js, WordPress, Bootstrap, Tailwind CSS
- **Operating Systems:** Linux (Ubuntu), Windows

Soft Skills

- Problem-solving and analytical thinking
- Team collaboration and adaptability
- Strong communication and presentation skills
- Attention to detail and debugging expertise

Experience

Intern, Internship Studio (Core Java)

Sep 2024 – Nov 2024

- Developed Java-based backend applications, optimizing performance by 20%.
- Implemented Object-Oriented Programming principles for scalable software.
- Gained hands-on experience with data structures and algorithms in Java.

Intern, Ybi Foundation (Data Analytics)

Aug 2024 – Sep 2024

- Analyzed datasets and performed segmentation analysis using Python.
- Built interactive data visualizations using Matplotlib and Seaborn.
- Extracted insights to support business decisions.

Projects

Smart PDF Analyzer: Sentiment Assessment and Citation Detection (Ongoing)

- Developed a Python-based system to analyze PDFs for sentiment classification.
- Implemented citation detection using Natural Language Processing (NLP).
- Optimized model accuracy by 20% through dataset fine-tuning.

Pizza Bill Generator App (Core Java)

- Designed a Java-based billing system with an intuitive user interface.
- Implemented real-time price calculation and input validation.
- Applied OOP concepts for modular and maintainable code.

Random Password Generator Website

- Built a secure password generator using JavaScript and HTML/CSS.
- Integrated cryptographic functions to enhance security.
- Deployed the project using GitHub Pages.

Hill and Valley Prediction (Logistic Regression)

- Developed a machine learning model to predict terrain features.
- Used logistic regression to classify hill and valley formations.
- Implemented in Google Colab for interactive analysis.

Certifications & Courses

- **Core Java Certification** – Apna College
- **Machine Learning Specialization** – Coursera (Andrew Ng)
- **Full-Stack Web Development Bootcamp** – Udemy
- **Data Analytics Internship** – Ybi Foundation

Achievements

- Successfully completed multiple internships in Java development and data analytics.
- Developed an NLP-based PDF Analyzer as a final-year project.
- Active participant in coding challenges and hackathons.
- Participated in Unstop competitions.

Hobbies & Interests

- Passionate about game development and exploring AI in gaming.
- Enthusiastic about competitive programming and coding challenges.
- Enjoy photography, technology blogging, and open-source contributions.

Languages

- English (Fluent)
- Hindi (Fluent)
- Bengali (Fluent)
